

THE 6 CORE INTENTIONS

Field Reference & Specialist Alignment Guide

When configuring your crew member counterpart, choose the intention that matches the specific phase of your workflow where you need more balance and support. Rather than forcing one assistant to do everything, match your counterpart to the phase of your work.

1. DISCOVERING

Exploring what already exists, scanning unfamiliar areas, and gathering landscape intelligence.

When to Use

You are entering an unfamiliar domain, researching competitors, or mapping background context before developing your idea.

The Posture

It is precise when answering direct queries, expansive when mapping territory, and connects new concepts through frameworks you already understand.

What It Protects

Prevent yourself from drowning in information overload or operating on blind assumptions.

Sample Crew Members in this Intention

- **Landscape Scout**
It scans unfamiliar areas, maps key players, and surfaces emerging patterns before you start building.
- **Trend Hunter**
It explores cultural and technological shifts, identifying early signals and relevant case studies.
- **Research Partner**
It gathers grounded background context, source references, and real-world examples without overwhelming you.

2. IDEATING

Opening possibilities, riffing on early creative sparks, and exploring high-contrast angles.

When to Use

You have a seed of an idea you want to expand, a blank page, or feel stuck in conventional thinking and need lateral perspectives.

The Posture

It builds upon partially-formed thoughts in a playful, generative, and unconstrained manner without rushing to conclusions.

What It Protects

Prevent premature editing of your ideas so that fragile, high-potential ideas can flourish.

Sample Crew Members in this Intention

- **Story Spark**
It riffs with you on your creative seeds, asking you questions to open lateral angles and provide novel storytelling hooks.
- **Angle Expander**
It generates multiple distinct vantage points for any single problem, challenge, or headline you bring to the moment.
- **Edge Explorer**
It pushes past obvious, safe ideas to explore provocative, high-contrast possibilities.

3. CLARIFYING

Untangling cognitive noise, distilling sprawling thoughts, and locking true signal.

When to Use

You need to isolate your core heading when your head is swimming with ideas, notes, files, and discussions.

The Posture

It is deeply attentive and structured, holds the moment, and reduces volume while maintaining your core ideas.

What It Protects

Prevent analysis paralysis and ensure you are building on a clear foundation.

Sample Crew Members in this Intention

- **Signal Finder**
It takes your long-form voice notes or messy brainstorm and extracts core themes and underlying intent.
- **The Distiller**
It cuts your cognitive noise and condenses sprawling conversations into crisp, validated bullet points.
- **The Compass**
It restores focus when you feel overwhelmed, keeping you pointed directly at your true heading.

4. AMPLIFYING

Developing ideas/outlines into full-bodied structures and repeatable models.

When to Use

You need a focused partner to help you expand your idea into a full draft in your authentic voice.

The Posture

It is expansive, disciplined, and rhythm-aware; fleshes out your arguments, provides grounded analogies, and crafts smooth narrative bridges.

What It Protects

Prevent writer's fatigue and keep long-form creation aligned with your natural style.

Sample Crew Members in this Intention

- **The Draft Builder**
It turns your outline/idea into expansive first drafts in your authentic voice.
- **Framework Architect**
It structures your insights/ideas into visual models or methodologies.
- **Narrative Expander**
It fills out your sparse notes with vivid metaphors, grounded examples, and narrative bridges.

5. STRENGTHENING

Pressure-testing assumptions, spotting blind spots, and verifying rigor before delivering.

When to Use

You have a completed draft, proposal, or talking points and need a tough, supportive review before presenting it to stakeholders.

The Posture

It brings incisiveness, analysis, and constructive skepticism by testing what must hold true for your idea to succeed.

What It Protects

Guard yourself from public missteps, unvetted premises, and endless polishing loops.

Sample Crew Members in this Intention

- **The Closer**
It cuts through scope creep and your overthinking by holding a firm line to help you finalize and deliver your thing.
- **Stress Tester**
It acts as a tough reviewer by identifying weak arguments, logical gaps, and unvetted claims.
- **Assumption Checker**
It uncovers invisible/assumed premises in your proposal and tests what must hold true for your plan to work.

6. PREPARING

Rehearsing high-stakes conversations, keynotes, and executive interactions in a safe sandbox.

When to Use

You need clarity and confidence when you walk into a high-stakes moment such as a board review, client pitch, delicate negotiation, or team address.

The Posture

It roleplays real stakeholders; pushes back with realistic objections; and provides immediate feedback of your delivery and impact.

What It Protects

Replace your anxiety with embodied confidence before you step into the room.

Sample Crew Members in this Intention

- **Room Rehearsal**
It simulates real-time questions and pushback from skeptical stakeholders before your presentation.
- **Pitch Sparring Partner**
It roleplays an investor, executive, or client, giving immediate feedback on where your pitch stumbles.
- **Difficult Conversation Guide**
It helps you rehearse delicate feedback or sensitive negotiations in a psychologically safe space.
